

VIXL / A DESIGN STUDIO FOR AI AGENTS

Ideas become editable.

Graphics. Documents. Motion.
MCP · CLI · Python · REST

THIS DECK IS MADE WITH VIXL

A design is a **document**.

01

Content

Text, vector paths, images, masks and effects.

02

Structure

Groups, variables, pages, layouts and reusable components.

03

History

Undo, checkpoints, branches and document diffs.

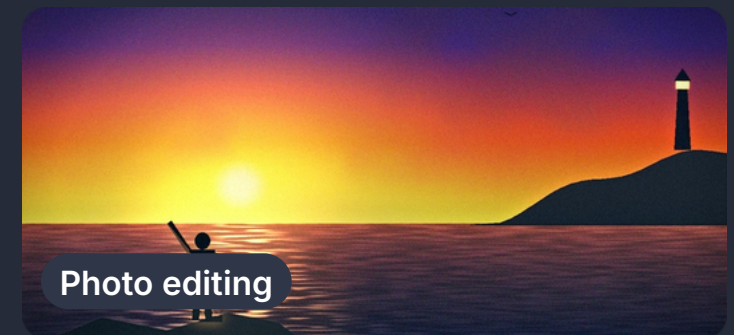

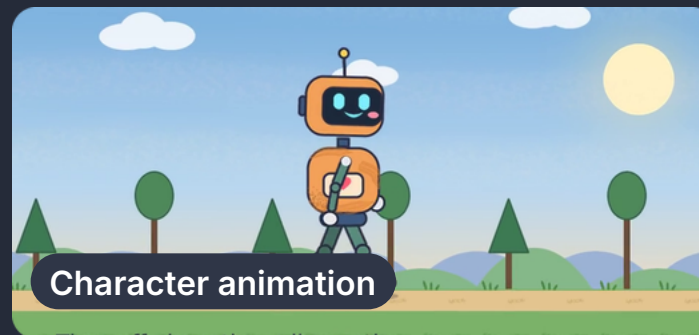

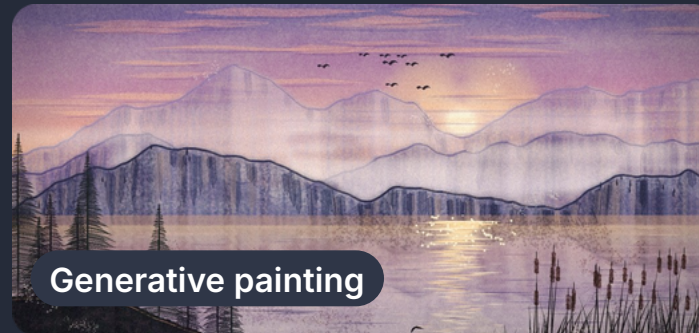

Feedback at **every step.**

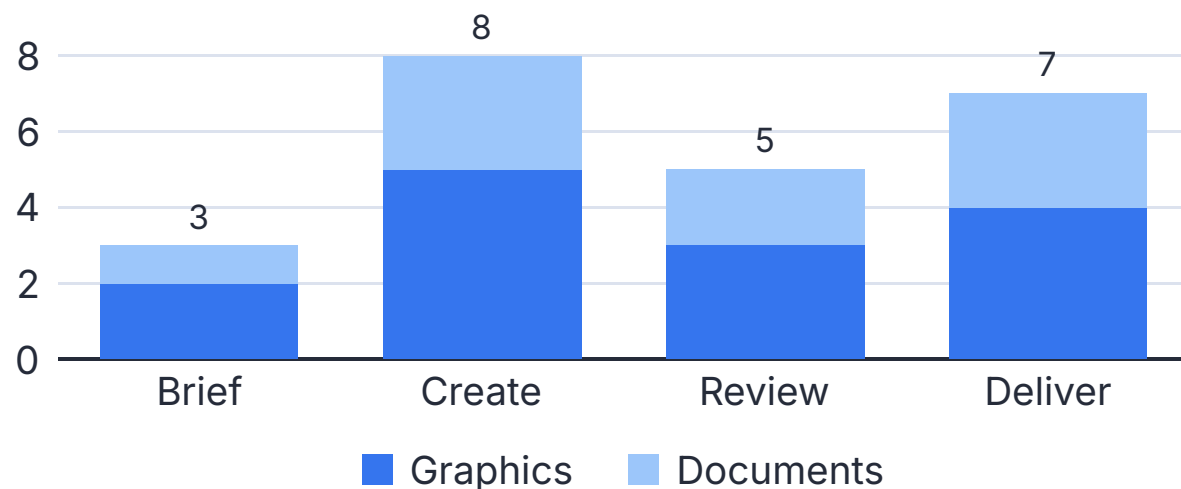

Read the structure. Apply atomic edits. Check requirements.
Render and review the design. Export the files.

A BROAD CREATIVE TOOLSET

From print to pixels.

Edit the data. **Keep the chart.**

ILLUSTRATIVE WORKFLOW DATA

Change values with chart-data.

Vixl updates the scale, bars, labels and totals.

PPTX includes the data table.

One recipe. Useful variations.

recipe. Three useful posts.

Peel the layers.

Inspect and revise layered designs.

[m/jxburros/Vixl](#)

Make the data a story.

Editable charts, diagrams and documents.

[github.com/jxburros/Vixl](#)

Put ideas in motion.

Keyframes, app states and reusable animation.

[github.com/jxburros/Vixl](#)

Typed inputs + variables

Text fitting + saved checks

CSV-driven batches

Reusable containers and templates

Animate the idea. Package the behavior.

01

Author

Keyframes, motion recipes, character poses, cameras and audio.

02

Export

GIF, animated WebP, APNG, MP4 and other supported timeline formats.

03

Integrate

App states, theme variables, transitions and reduced-motion stills.

Make requirements **measurable**.

01

Define

Save layout and delivery requirements as test suites.

02

Inspect

Run checks, review findings and look at actual previews.

03

Share

Use offline proof pages or a live REST review session.

Designs belong in the **workflow**.

01

Git review

Readable JSON + assets
through pack and unpack.

02

Shared work

Branches, explicit merges,
project groups and
reusable libraries.

03

Portable files

Embedded content and
fonts, plus the editable
master.

FOUR WAYS IN

Same operations. **Your tools.**

01

MCP

Connect an agent to the workspace.

02

CLI

Script and batch from a terminal.

03

Python

Compose files from code and data.

04

REST

Integrate with web services.

Send the formats **people need.**

01

Screen

PNG, JPEG, WebP, SVG
and icons.

02

Documents

PDF, fillable PDF, PPTX and
HTML decks.

03

Print + motion

CMYK PDF/TIFF, GIF,
WebP, MP4 and more.

START CREATING

Give your agent a **design studio**.

```
terminal  
  
git clone https://github.com/jxburros/Vixl.git  
cd Vixl  
python -m pip install -e '.[server,pdf]'  
vixl mcp --workspace . --tools core --schema slim
```
