vixl

The image editor your AI agent can actually use.

Release 0.21.0 · MCP · CLI · Python · REST

THE PROBLEM

Design tools are built for hands, not agents.

01

Click-only

Sliders, canvases and menus an agent cannot see or drive.

02

Flattened

Image generators return pixels; the layers and text are gone.

03

Unchecked

Nobody knows the headline overflowed until a human looks.

THE SOLUTION

Design as atomic, checkable operations.

- Editable .vixl masters: text, vector paths, masks, pages
- 180 operations, up to 10,000 per atomic batch
- Structured errors with suggestions
- Undo, branches, checkpoints and diffs

design.json

```
[
  {
    "type": "layout-apply",
    "name": "hero-statement",
    "title": "Launch day",
    "seed": 7
  },
  {"type": "look", "look": "glow"}
]
```

vixl

HOW IT WORKS

One loop for every design.

01
Inspect
Read layers, bounds and fonts

02
Apply
Atomic batches, up to 10,000 ops

03
Check
Contrast, overlap, bounds, print

04
Preview
Render and look

05
Export
PNG, SVG, PDF, PPTX, MP4 ...

Checks find overflowing text, low contrast, overlaps, unsafe margins, missing glyphs and print ink problems, so the agent fixes them before anyone looks.

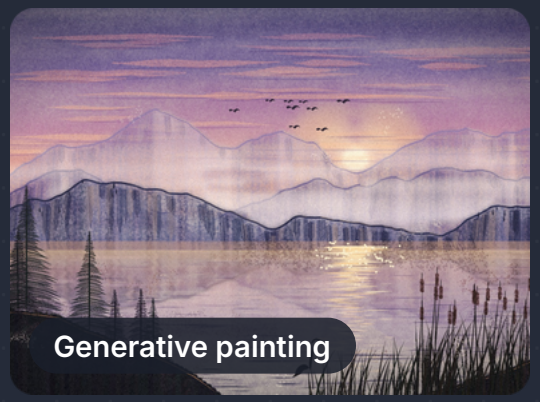

vixl

MADE WITH VIXL

Posters to pixel games.

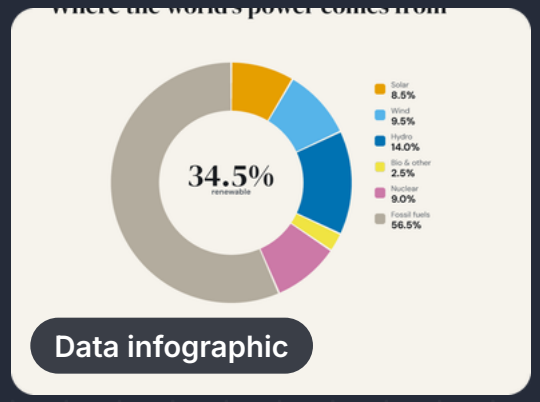

Print poster

Generative painting

Pixel-art game

Data infographic

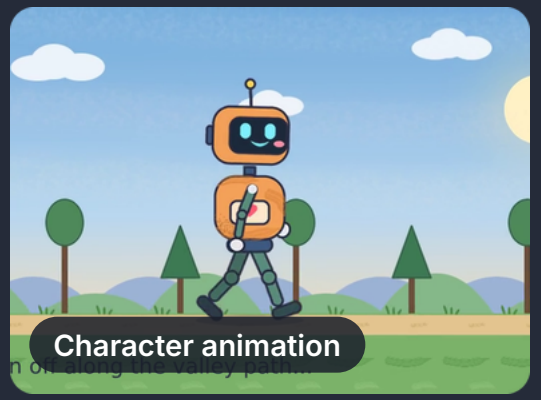

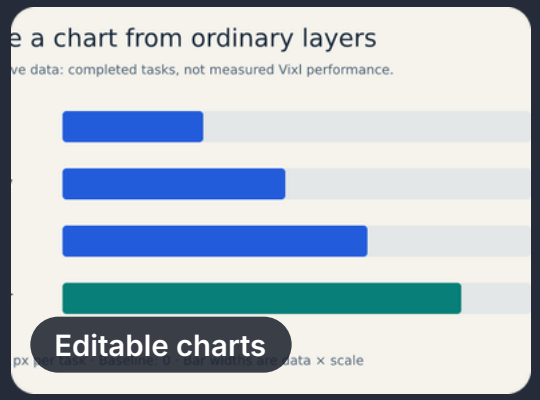

Character animation

Photo editing

Tile maps

Editable charts

FAST WHERE IT MATTERS

Seconds, not minutes.

~~10+ min~~

17 s

Full design check, 11 x 17 poster

~~9.8 s~~

1.6 s

Paint 400 brush strokes

~~10.7 s~~

0.3 s

Add 1 stroke to a 3,000-stroke layer

Timings from the repository's exploration projects (explorations/README.md), before and after the performance fixes in Vixl 0.18.0.

INTERFACES

Four doors, one engine.

MCP

```
vixl mcp --tools core
```

Agents in Claude Code and other MCP clients

CLI

```
vixl -p a.vixl text add 'Hi'
```

Scripts, CI pipelines and batch jobs

Python

```
Project(800, 600).apply([...])
```

Notebooks, generators, data merges

REST

```
POST /operations
```

Web apps and live human review

vixl

OUTPUTS

One master. Every format.

PNG	JPEG	WEBP	TIFF
AVIF	SVG	PDF	PPTX
HTML	ICO	GIF	MP4
CMYK	WebM	APNG	WAV audio

vixl

Give your agent a design studio.

terminal

```
$ pip install -e '.[server,pdf]'
$ vixl mcp --workspace . --tools core --schema slim
```
